

## Medication Compliance

### Why is it important?

- ✓ Almost **30% of all hospital admissions** for people over the age of 65 are directly attributable to medication non-compliance.
- ✓ **125,000 people die each year** from non-compliance, twice the number killed in automobile accidents.
- ✓ Poor compliance with medication regimens costs **society \$150 billion per year**.
- ✓ Nearly \$48 billion in annual costs result from unnecessary medication-induced hospitalization.
- ✓ Approximately **40% of people entering nursing homes** do so because they are unable to self-medicate in their own homes.
- ✓ About one-half of the 1.8 billion prescriptions dispensed annually are **not taken correctly**, contributing to prolonged or additional illnesses.
- ✓ At the present time, more than **7 million households** have an unpaid "care-giver" who is providing daily assistance to a family member age 50 or older.

## The Care Center

**Care...** the essence of what we provide. Whether getting assistance, providing reassurance, or just a friendly voice, we're there when others can't be, and happy to speak with a "member" anytime.

**Center...** because we are at the center of getting information to all the parties involved in keeping our members safe and at home, where they are most happy.

**You can have confidence** the Care Center will be there when you need it. We designed it to incorporate the latest equipment and services from the leading companies in telephony and data processing.

- You've forgotten to take your meds!
- The dispenser signals the CMA400
- The CMA400 calls our central station to remind you to take your medication.
- You take your medication from the dispenser.

PEACE OF MIND

INDEPENDENCE

Chaperone Medical Alert™

GIVES YOU THE TOOLS TO KEEP YOU AT HOME FEELING CONFIDENT AND SAFE

Medication Management

How it works...

The alarm sounds when your dose is ready. If not taken the unit will contact the Care Center.

1

Simple & Reliable

1. Load
2. Set clock
3. Program alarm
4. Close

Here's how it works...

When the time comes to take your next dose, the alarm will sound and the dose will rotate into position. The alarm stops when the dose is taken out. If the dose is not removed within 30 minutes, the unit can contact the 24-hour Care Center which then attempts to alert someone of a non-compliance event. *It's really that easy!*

every dose...on time

2

"Ed this is the Care Center, it's time to take your medication."

3

"Oh, OK thanks for the reminder. I guess I didn't hear it and was so busy I didn't realize it was time to take my pills out of the machine. Thanks so much, I'll go in and take them right now."

ALWAYS  
24/7  
ACTIVE

Lots of Prescriptions?

Keeping up with a lot of prescriptions can be a real challenge. There may be one set of pills and vitamins to be taken in the morning, another set to be taken throughout the afternoon, and still other pills before bed.

Now there's an easier way to manage all those pills. The MD2 simplifies everyday medication management, giving you more time and freedom. It is simple and reliable, and the convenient medication dispensing cups are much easier to open than a pill box or prescription bottle.

Simple-to-use cups... no hard to open pill bottles or boxes.

MD 2

Our goal has always been to keep people safe and independent as long as possible.

Helping people manage their prescription therapies more effectively is key to accomplishing that goal.

Right Med  
Right Dose  
Right Time

You'll have fewer worries about...

- Forgetting to take a dose
- Taking a double dose
- Taking at the wrong time
- Identifying pills or pill bottles for people with decreased vision
- Opening and closing pill bottles
- Privacy regarding the type and quantity of medication
